PROFESSIONAL SUMMARY

Results-driven Game Designer with 4 years designing player-first mobile game systems that drive community engagement and long-term retention. At PlaySimple Games, designed economy and progression systems for Word Roll 40k+ DAU that delivered 71% monetization improvements and 35% retention increases through data-driven feature design and social engagement mechanics. Proven expertise in end-to-end feature ownership - from ideation to launch - including LiveOps events, reward systems, and competitive social features that contributed to 10x user growth. Focused on social gaming experiences that bring players together while driving sustainable business metrics through balanced economies and compelling progression loops.

WHAT I FOCUS ON

- **Feature Design & Documentation:** Comprehensive feature specification writing, technical implementation guidelines, cross-functional communication, quality assurance processes
- **Critical Thinking & Analysis:** Player behavior analysis, competitive intelligence, data-driven decision making, strategic problem-solving
- **Mobile Game Systems:** PvP mechanics design, event-based monetization, economy balancing, progression systems
- **LiveOps Expertise:** Deployed 5 cohort-personalised LiveOps events using Kinoa.io
- **Tools Creation:** Built Spec Maker and Meeting Manager with Cursor AI, increasing team productivity by 25%

TECHNICAL PROFICIENCY

Unity, Excel, Google Sheets, Figma, SensorTower, Data.ai, Google Analytics, A/B Testing, JIRA, Confluence, Kinoa.io, Cursor AI

KEY ACHIEVEMENTS

- **Social Engagement Leadership - Food Fiesta 2024**
 - Designed Food Fiesta event mechanics, including its Tiles cosmetic rewards, balanced gacha systems and progressive reward tracks, generating 71% monetization increase and establishing a template for future LiveOps events that enhanced community interaction. Created reusable event infrastructure that became standard for our social gaming initiatives.
- **Community Building Innovation - Ticket Mania 2024**
 - Redesigned Ticket Mania leaderboard architecture with skill-based matchmaking and dynamic rewards, creating organic social groups around competitive goals that increased player LTV by 10% and improved D1 retention rate by 300 basis points.
- **Player Experience Optimization - Word of the Day 2024**
 - Transformed Word of the Day from passive feature to interactive collection mechanic that fostered daily engagement habits, achieving 140 basis points D1 retention improvement and 3% overall engagement increase.
- **AI Innovation & Team Productivity 2026**
 - Built AI-assisted Spec Maker and Meeting Manager tools that became standard workflow for 8-person development team, improving documentation efficiency by 25% and establishing a culture of productivity innovation.

PROFESSIONAL EXPERIENCE

Game Designer | PlaySimple Games | August 2022 – Present (4 years)

- Wrote detailed feature specifications for 25+ features and built ~25 systems, including seasonal events, battle pass mechanics, and competitive leaderboards with complete technical requirements
- Conducted competitive analysis of 50 mobile games using SensorTower and Data.ai, identifying market opportunities that influenced product roadmap
- Established data-driven feedback loops, partnered with product, and used A/B testing frameworks to validate design decisions and optimize feature performance

EDUCATION

PG Diploma in Game Design | ICAT Design & Media College | 2021–2022

BA LLB | Department of Law, Calcutta University | 2015–2020

ADDITIONAL STRENGTHS

- **Mobile-First Approach:** Expert in mobile-optimized feature design and session-based gameplay optimization
- **Business Acumen:** Strong understanding of F2P monetization, LTV optimization, and mobile game economics
